AB 25. The system of claim 24 wherein the interference arm is connected to the body adjacent the engaging member.

AB 27. The system of claim 26 wherein the upper shaft portion includes a plate and the engaging member engages the plate.

AB 29. A system for stirring paint in a can, comprising:
a can cover with a paint stirrer that includes a rotatable drive shaft;
a can support shelf; and
a stirring head positioned above the shelf, the stirring head comprising a body including an interference arm that extends downwardly toward the shelf that prevents rotation of the cover as the stirrer rotates by interfering with the cover and an engaging member for engaging a portion of the drive shaft extending above the can cover.

AB 32. The system of claim 31 wherein the shaft portion includes a plate with upwardly extending fingers and the stirring head including a driver with a blade actuatable with the fingers to effect rotation, and the engaging member engages the plate.

AB 38. A paint stirring head body that can be positioned above a paint can cover including a rotatable drive shaft, the body comprising a downwardly extending interference arm arranged to interfere with the can cover to prevent rotation of the cover as the drive shaft rotates.

AB 42. The body of any of claims 39 to 41 wherein the engaging member is connected to a body.

AB 43. The body of claim 42 wherein the interference arm is connected to the body adjacent the engaging member.
